

# S1 Consulting & Software Services

## Education Sector—Capability Statement

### S1 Consulting—delivering effective project management, IT services and software solutions to the Education Sector.

With the ever-increasing speed of change and competition within the education sector, there is currently more pressure than ever to ensure administrative efficiency and new project delivery meets stakeholder, staff and student requirements. This pressure typically occurs under very tight delivery timeframes, with short ramp up periods, managing multiple service or supplier interfaces, and with a scarcity of skilled and experienced resources.

#### The Challenge

How do you juggle your best administrative and technical staff between new project initiatives and day-to-day management with an ever-increasing workload?

#### Our Solution

S1 Consulting can help you overcome these issues through the delivery of People, Processes and Technology. We can help you focus on what you do best by providing the experts, the proven methodologies and business processes, and the software solutions, when you need them most. We have assisted Universities, TAFEs and Private Providers in the definition, selection, implementation and support of a wide range of mission critical software applications, new business processes, bespoke software developments and system integration. Our aim is to become a trusted advisor to our clients, someone you can count on to deliver the results and goals that your stakeholders, staff and students demand.
