## Product Update

### S1 Launches E-Commerce with Systemhound

You can now buy the awarding winning Systemhound online at [www.s1consulting.com.au/systemhound.asp](http://www.s1consulting.com.au/systemhound.asp).

Systemhound is a comprehensive Windows PC and server inventory and audit package.

- IT Audits Made Easy
- Software Versions Checked
- Licensing Issues Resolved
- Hardware Changes Logged
- Better Planned Upgrades

Systemhound is a scalable PC inventory solution for Windows networks. It offers detailed hardware and software inventory reports via a web interface and over your intranet, enabling you to track changes to your infrastructure and ensuring software license compliance.

The Systemhound clients are installed on PCs and servers across your network (and off your network) to ensure accurate and up-to-date information is always available at the touch of a button. A variety of deployment options makes installation a breeze and once Systemhound is installed, there is no need to carry out another audit process as the inventory information you require is instantly available and is self-updating.

## Real Stories for the Non-Technical

"Do you know anything about this fax-machine?"

"A little. What's wrong?"

"Well, I sent a fax, and the recipient called back to say all she received was a cover-sheet and a blank page. I tried it again, and the same thing happened."

"How did you load the sheet?"

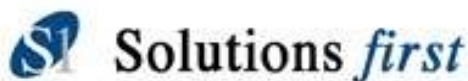

"It's a pretty sensitive memo, and I didn't want anyone else to read it by accident.

So I folded it so only the recipient could open it and read it."

Tech Support: What does the screen say now?

Caller: It says 'Hit ENTER when ready.'

Tech Support: Well?
