

Consulting &
Software Services

Serving the Education Sector

April 06; S1 Consulting News

S1 - Funding Development Management

S1 leads the Higher Education industry in functional, operational and technical domain expertise. We also have a thriving Sales Outsourcing Division whereby we launch and represent other software and service providers into the Education Sector.

The growth in sales of our Scholarships Management Solution and the proliferation of news articles outlining the need for Australian Higher Education Providers to seek alternate and new funding streams has led us to launch S1—Funding Development Management (S1-FDM).

S1-FDM combines our proven sales and marketing ability with our knowledge of the Education Sector to represent and help our customers secure and increase funding streams. We will work with our customers to develop and implement a sales and marketing plan aimed at targeting philanthropic, corporate, individual investment and government funding sources. We see substantial potential in presenting corporate, government and individual investors with funding models that can deliver real and measurable returns.

Provide an investor with a known and measurable return and you have their focus.

The increased funding sources could then be used to attract targeted students with scholarships, graduate career programs, offering privately funded loans to Full-Fee paying students, building funds, research grants, IP exchange, etc.

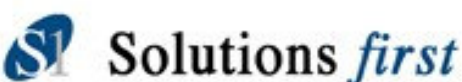

Unlock the value of your institution by engaging Marketing Professionals that understand the education sector to represent you and secure more funding. To arrange a meeting to discuss the type of services S1-FDM could provide your institution, please click [here](#).

“Putting you first, keeps us in front”

Five Years Later, a dog comes home

Holly and Troy Webb said they thought the worst when Gidget, their Lhasa apso, ran away in 2001. "We thought maybe she got hurt or something, but nobody called or anything like that," Holly Webb told WNDU-TV. But the South Bend Animal Control officials called the Webbs last week, saying they found the dog, still wearing the collar and tags she had on when she disappeared. "When I saw her, it was like seeing a ghost," Troy Webb said. Gidget, missing for four years and seven months, is now 12 or 13 years old. She came home with matted fur and moves a bit slower but was otherwise all right, the Webbs said. The Webbs said they believe someone had their dog. She had been fed but not groomed.
