

S1 Expands Consulting Team.

Over the past 3 months S1 has performed a wide range of consulting projects at several institutions and expanded its consulting team. Below is a summary of the type of consulting services S1 is providing to their customers.

- **Student Finance Consulting;** S1 is working at several Universities on a range of Student Management Systems (SMS) assisting with tasks like; Fee Configuration Setup for 2006, Reconciliation of Debt between the SMS and the Finance System, Setting Up and Testing Automatic Encumbrances, Working on Student Fee Production Issues along with Reconciliation Reports Using Oracle Discover and Cognos.
- **Business Analysis;** S1 Business Analysts are currently working with customers for the development of requirements specification documents in areas like; online enrolments, late enrolment management, course and unit approval and modification management, and Government reporting requirements.
- **Technical Consulting;** S1 consultants are providing software development and support services for jobs like; the development of localised forms and applications, webpage design and development along with general work requests. These tasks are being performed both on-site and remotely via VPN services.
- **Project Management;** S1 has project managed the scoping and implementation of S1—Scholarships and iWebfolio (Electronic Portfolio) at three Universities over the past month.
- **Management/Product Selection Consulting;** S1 is currently assisting several Universities and Private Providers to define their CRM and SMS requirements needs.
