

S1-BMS - Benefits Management System

The use of Scholarships, Awards, Grants, Fellowships, Prizes, etc by Educational Institutions, Government Departments, Research Centres, Community Groups and Special Interest Groups to engage, award and target the community, individuals and corporations for specific outcomes and/or goals is growing in prominence. With this growth is the need for a robust, easy to use and fully supported software application. S1 Consulting & Software Services (S1) in conjunction with several Australian Universities has developed a comprehensive software solution to manage the end to end process of Benefit Management. A Benefit can be a scholarship, student loan, award, prize, grant, fellowship, exchange, etc.

S1-BMS - The total Benefit Management Solution.

At S1 we pride ourselves on staying ahead of our competitors by offering high quality products that help our customers achieve their goals. **S1-BMS** – the S1 Benefit Management System has been developed to cater for the growth in Benefits within Australian Higher Education sector along with Government Departments, Private Institutes and Industry Bodies.

S1-BMS is a wholly Australian made and owned product. It has been developed by a team of talented designers who care about providing solutions to your Benefit Management problems. These people have direct experience within our clients businesses that ensures that the solutions that **S1-BMS** provides are relevant and

appropriate to your business and reporting requirements.

How does S1-BMS work?

S1-BMS enables all Benefit processing to be done both efficiently and easily in a central, online, enterprise-scale system. As an example, **S1-BMS** offers the following capabilities:

- **Recording of all Benefit applications.** This includes multiple applications; approved and declined applications; and applications from 3rd party organization. We can also link our application to on-line application pages.
- **Intelligent Evaluation processing and recording.**
All evaluation measures can be recorded in **S1-BMS** and where possible, the evaluation of these measures and criteria can be automated. This reduces the onerous task of manually evaluating selection criteria where this adds no value to the process.
- **Maintenance and applying outcomes to applications.**
Ranking and award of benefits based upon configurable ranking algorithms.
- **Online application**
Benefit applicants may use an online application internet portal.
- **Maintenance and applying outcomes to applications.**
A variety of statuses and outcomes can be applied to applications. These can be monitored and managed through the intelligent reporting capacity of **S1-BMS**.
- **Management and monitoring of Benefit payments.**
All facets of the payment and distribution of benefits can be managed within **S1-BMS**.
- **All internal transfers and incoming funds can be mapped and regulated.**

S1-BMS takes the guess work out of managing funds against Benefit payments. Payments may be made on a defined period basis, and this means accurate accounting takes place.

- **Management of the Funding Providers**

S1-BMS has a module dedicated to the management of the relationship between your organization and the funding providers. Budgets can be maintained and powerful reports are easily extracted.

Hosted or Local Solution

S1-BMS can function as either a hosted solution or a locally installed solution.

A hosted solution means that you access **S1-BMS** via your web browser and the all support and maintenance and tasks such as back-ups, database administration, upgrades and communications is managed by us. This model provides you with the power of an Oracle Database at a fraction of the cost. We can provide the hosted model at an attractive price, even if you only have a handful of Benefits being managed.

A local solution is when we install the application and database on a server within your environment. This model is best suited for the larger organization which has an IT support division and the quantity of Benefits to justify the infrastructure.

Our consultants can work with you to assess your needs.

Why choose S1 Consulting & Software Services and S1-BMS?

When you purchase **S1-BMS** you are not only purchasing a well-made value-for-money product, you are also employing the expertise of S1 Consulting & Software Services. The employees of S1 have a wealth of experience and knowledge within the management of Benefits and when combined with the intelligent and common sense design of **S1-BMS** this provides you with a sensible solution to your Benefit management problems.
